Resume

In order to receive the information regarding Georgian geological locations and fossils it's often necessary to search through dozens of books and other resources. Paleontological database gives us opportunity to get this information in a much easier format that accessible for everyone. The database will be available for personal computer and mobile users likewise, which will speed up the process of getting and analyzing data. It will let users filter fossils according to regions and will gather and put in practice the precious resources created through decades.
